WE BELIEVE THAT #SCHOOLCANBEDIFFERENT

All children are unique and deserve an education that meets their individual needs so they can reach their full potential. We blend digital learning with regular, one-on-one and face-to-face instruction with an Oklahoma certified teacher. EPIC's free, competitive and high-quality education also ensures every student has the 21st century learning tools they need, such as laptops and WiFi. Our dedicated teachers, principals and staff don't believe schools are entitled to students. Rather, Oklahoma students are entitled to a quality education. We know that school can and should be different.

"EPIC has undergone tremendous change in the 10 years of our school's existence, from relative obscurity to becoming the largest public school organization in the state of Oklahoma. Please contact me if you have any questions about our school's operations as we continue to strive for excellence and transparency while providing effective services to our students and families."
